# Navigating the myPurdue portal

Overview

When you log in, you'll be on your homepage.

From your homepage, use the tabs at the top to navigate to different category pages.

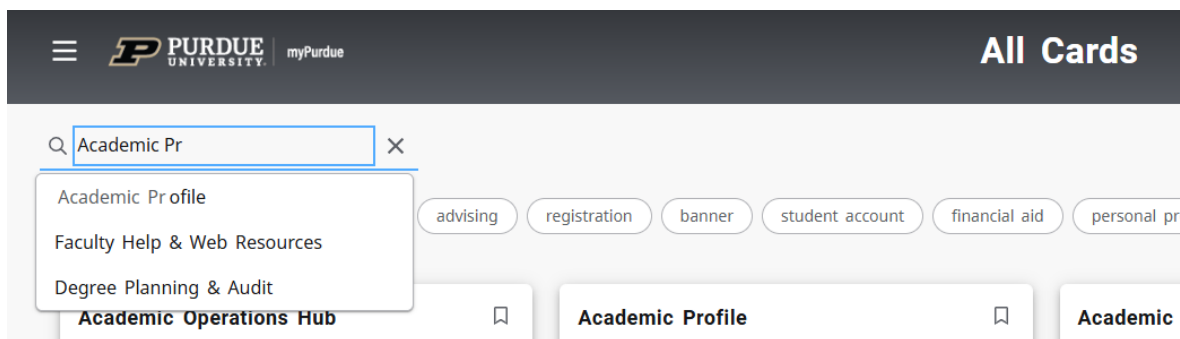

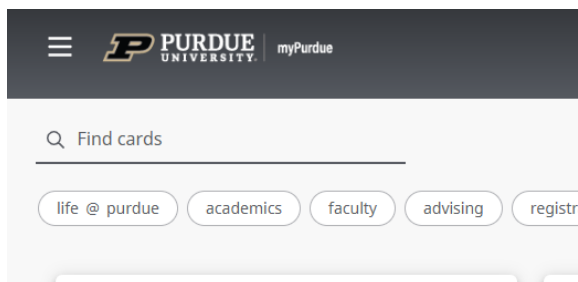

Note, you may not see *all* of the category page tabs shown in the screenshot above.

Select the VIEW ALL CARDS button to view *all* the cards you have access to in myPurdue. This is called the All Cards page.
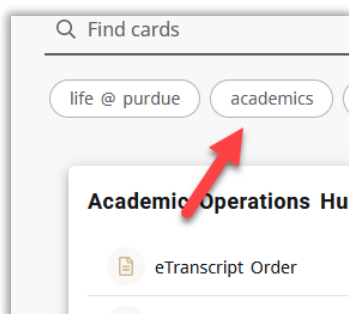

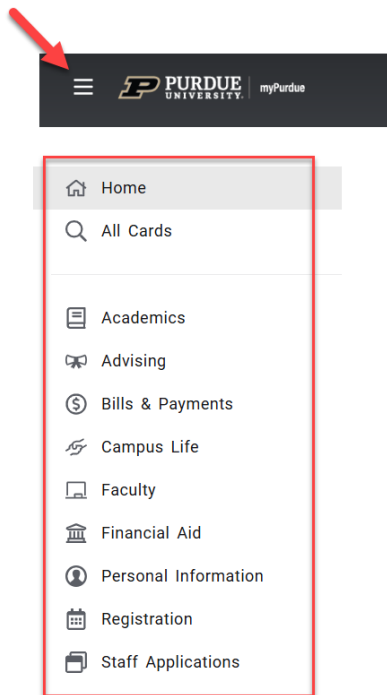

Note, the All Cards page used to be titled "Discover," but it still contains *all* the cards you have access to in myPurdue.

You can search for cards using the "Find cards" section. Type in either the card's title or search word(s). Card titles will populate based on your search. Note, if you are on a category page and your search does not return results, navigate to the All Cards page and perform your search there.

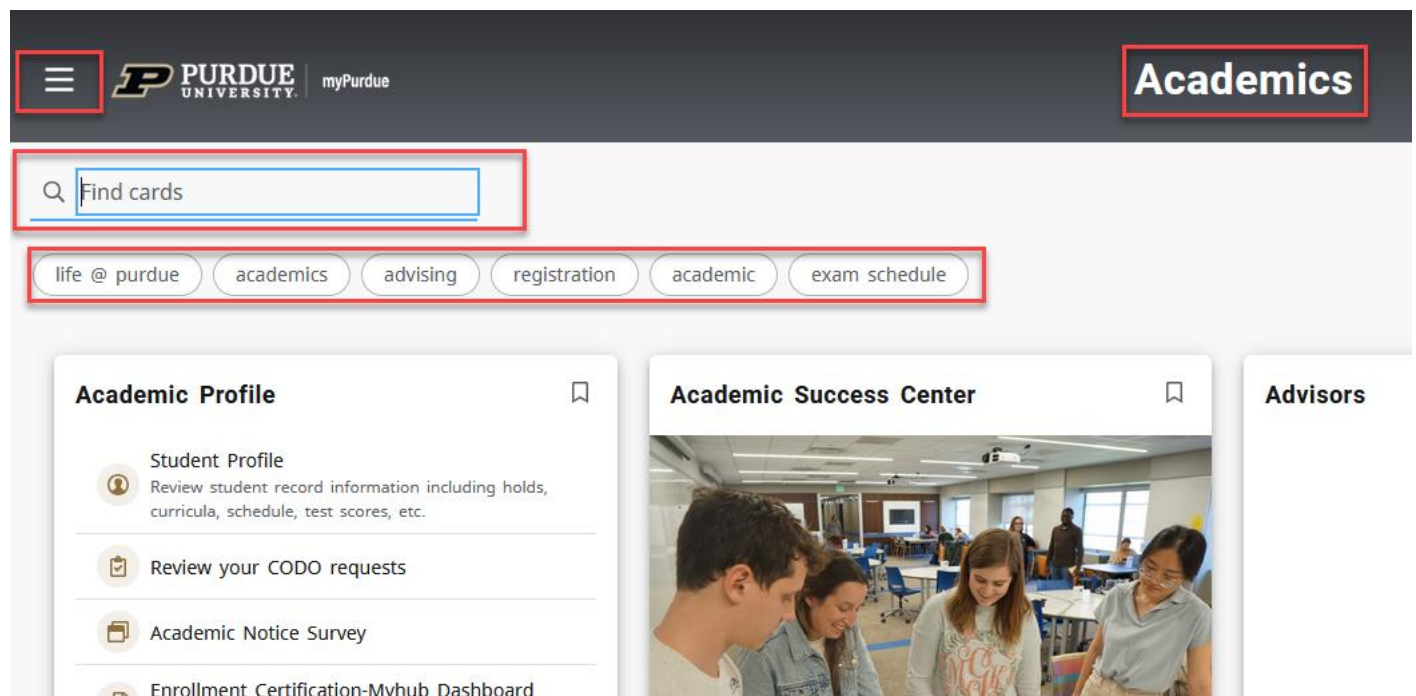

You can also use a tag to filter cards.

From any page, you can use the hamburger menu to navigate to different pages.

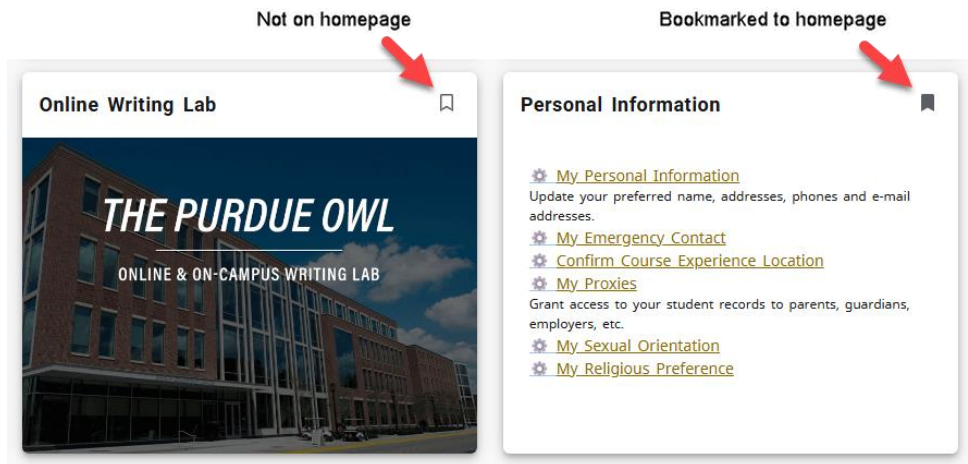

The one difference with navigating to a category page via the tab bar navigation on the homepage vs via the hamburger menu is that the search and sort features are *only* available if you navigate to the category page via the hamburger menu.

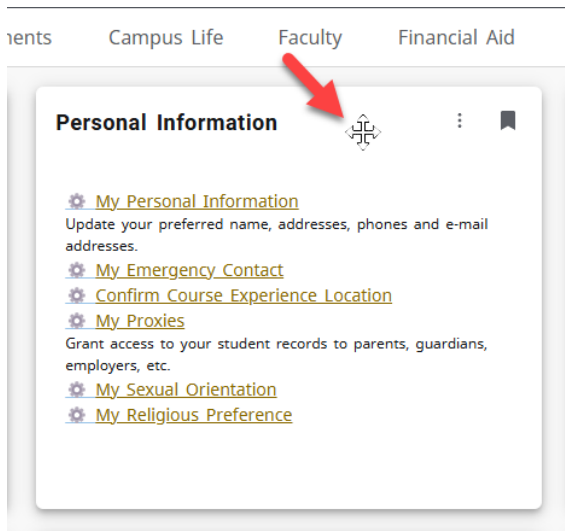

Note, some cards that are on the All Cards page are also on one of the category pages. However, not all cards on the All Cards page are on a category page.
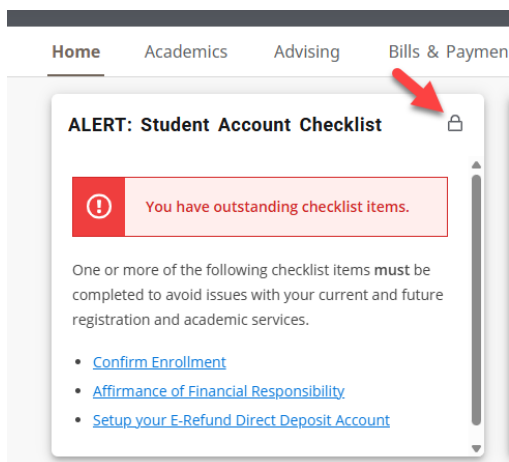

You can bookmark cards from the All Cards page or the category pages, to your homepage. You do this by selecting the bookmark icon in the top, right corner of the card. Regardless if bookmarked or not, all cards are displayed on the All Cards page.

On your homepage, you can move cards around.

You may have a card or two on your homepage that is locked. You cannot move a locked card.

Questions & Concerns

If you have any questions or would like to speak with a service desk agent, please call 765-494-4000 or email it@purdue.edu
